Design elements

In this section, we outline best practices for the use of Slack brand assets and offer useful examples.

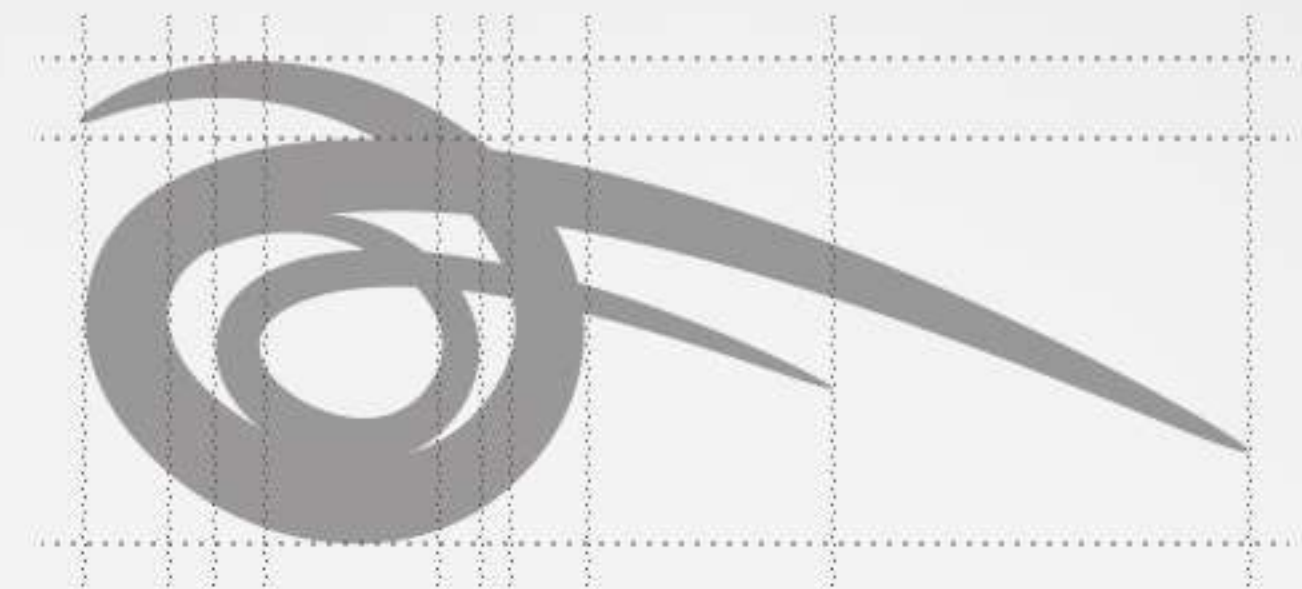

The Logo

The Venus Aesthetics logo features a refined and elegant eye symbol, crafted with fluid curves to represent vision, beauty, and precision — the core elements of aesthetic transformation. Its minimalist yet sophisticated design communicates trust, care, and expertise, embodying the brand's focus on personalized treatments and non-invasive innovations.

The clean typography paired with the emblem reflects confidence and clarity, making the logo instantly recognizable across all mediums. It aligns perfectly with our values of transparency, precision, and a client-centric approach to beauty and wellness.

The symbol is designed for high legibility at various sizes, with an adaptable version available for micro applications. This ensures visual consistency across all brand touchpoints — from social media icons and website favicons to print materials like business cards, brochures, and signage.

By maintaining consistent use of the logo and adhering to brand guidelines, Venus Aesthetics ensures a strong, cohesive visual identity that effectively communicates our commitment to excellence, innovation, and radiant self-confidence.

Brand Typography

The hero typeface for the brand is Haboro Contrast. This typeface should always be used when available on all digital or print assets.

The secondary typeface is Zona Pro. This typeface is a versatile and modern text font suitable for body copy across web and print. Zona Pro should be used where Oblik Classic is not available or when sharing media with those outside the business who may not have the primary font installed. These include materials like email signatures or PowerPoint presentations.

For script or decorative use, the brand utilizes Rustic Roadway — a handwritten-style typeface ideal for adding a personal or artistic touch in select applications such as quotes, testimonials, or special announcements.
