

VENUS AESTHETICS | IT'S ABOUT YOU

FINAL CREATIVE AND ACTIVATION PLAN

VENUS K-GLOW

A modern Korean beauty experience, unmistakably Venus.

Final team approval edition | Packaging, face-free props, clinic decor, event and social system

NON-NEGOTIABLE The PR box contains zero treatment cards. The first opening reveals one oversized message card; underneath are only the T-shirt, chrome K prop and sticker sheet.

01 | APPROVAL SNAPSHOT

What the team is approving

FINAL DIRECTION Venus black, cream, taupe and champagne remain the brand foundation. Korean energy comes from restrained coral, teal, violet, cobalt and holographic chrome, bilingual typography, face-free icon props and food - not from rebuilding the clinic.

Approved scope

- **PR box.** Two-stage reveal: one oversized message card, then exactly three contents.
- **Clinic.** Existing reception and rooms remain unchanged; all additions are removable or freestanding.
- **Props.** Seven suspended icon signs and seven matching handheld icon props, each face-free and bilingual.
- **Treatment rooms.** Removable plaques, vertical vinyl, mirror details and textile sleeves only; no balloons or ceiling suspension.
- **Event.** One portable Korean snack bar in the lounge plus the portable photo set.
- **Campaign.** Three Korean-model social key visuals using the Venus feed language.

Removed from final scope

- All treatment/photocards inside the PR box and every narrow card slot.
- Prize wheel, gift bags and glow-match desk.
- The old white treatment-card sign system and the old framed-card wall.
- Wave patterns, flowing-line motifs, swirls, marbling and every launch-date reference.
- Permanent clinic redesign, new built-ins, repainting or structural lighting changes.

Production truth

Generated visuals are concept and layout references. Final campaign photography must use licensed real Korean models or properly licensed photography; every production asset also requires native-speaker Korean proofing and the supplied official Venus master logo file.

02 | VISUAL SYSTEM

Venus foundation. Korean-modern accent.

The system is deliberately simple enough for local vendors to reproduce across paper, vinyl, acrylic, apparel and digital media.

ROLE	COLOR	APPLICATION
Venus black	#191919	Primary backgrounds, box wrap, apparel and signs
Cream / white	#F5F2EC / #FFFFFF	Negative space, model wardrobe, label fields
Light grey	#E1DFE0	Studio and clinic-neutral backgrounds
Champagne gold	#D5BF94 to #F9E2B8	Logo application, rules, foil and premium finish
Taupe	#9A9895 to #B6AF9E	Secondary neutral and support text
Korean accents	Coral / teal / violet / cobalt	Small edge bands, tabs, props and digital UI accents

GRAPHIC LANGUAGE Use clipped corners, straight grids, rounded labels, face-free line icons, small color tabs and holographic chrome. Do not use waves or flowing-line patterns.

- **Typography.** Use the official Haboro Contrast / Zona Pro system for production; pair with a licensed Korean sans serif after native-speaker proofing.
- **Logo.** Use only the supplied official master files. AI-rendered marks in concepts are placement references, not production artwork.
- **Photography.** Natural skin texture, restrained retouching, adult Korean models, modern wardrobe and no celebrity likenesses.

03 | PR BOX

Exterior: Korean intrigue, modern Venus finish

Final closed-box concept. Korean typography and holographic K create intrigue; production remains soft-touch, foiled and locally achievable.

- **Build.** 250 x 250 x 80mm internal; 1200gsm greyboard; magnetic flap; matte lamination and soft-touch coating.
- **Exterior.** Large holographic K, chrome Korean type and small straight accent tabs; no launch date.
- **Production.** Keep geometric spacing and crisp foil registration; no wave or flowing-line pattern.

LOGO RULE Follow the approved exterior layout; use the official logo only where the final artwork calls for it.

04 | PR BOX

First reveal: one oversized message card

The mirror opens to one full-tray card. There are zero treatment cards and no other contents visible at this stage.

- **Mirror.** 2mm acrylic, 220 x 200mm, polished edges; message confined to the top third so the face remains visible.
- **Reveal card.** Approx. 232 x 232mm, 600gsm black board, foil border, finger-pull tabs and the message 'SOMETHING IS COMING'.
- **Experience.** The card must cover the full lower tray and create a deliberate pause before merchandise is revealed.

ABSOLUTE RULE ZERO treatment cards, ZERO narrow cards and ZERO treatment-card slots inside the PR box.

05 | PR BOX

Second layer: exactly three contents

After lifting the oversized card, the recipient sees only the T-shirt, chrome K prop and sticker sheet.

- **T-shirt.** Black oversized 220-240gsm cotton; large chrome K; small official Venus logo at the back neck.
- **Chrome K.** 120mm laser-cut mirror acrylic on a short matte-black handle.
- **Sticker sheet.** A5 holographic vinyl with K, Korean words, sparkles, droplet, speech bubbles and Venus mark.

INVENTORY Exactly three contents. Do not add photocards, treatment cards, samples, vials or gift items.

06 | PACKAGING PRODUCTION

Complete box structure and opening sequence

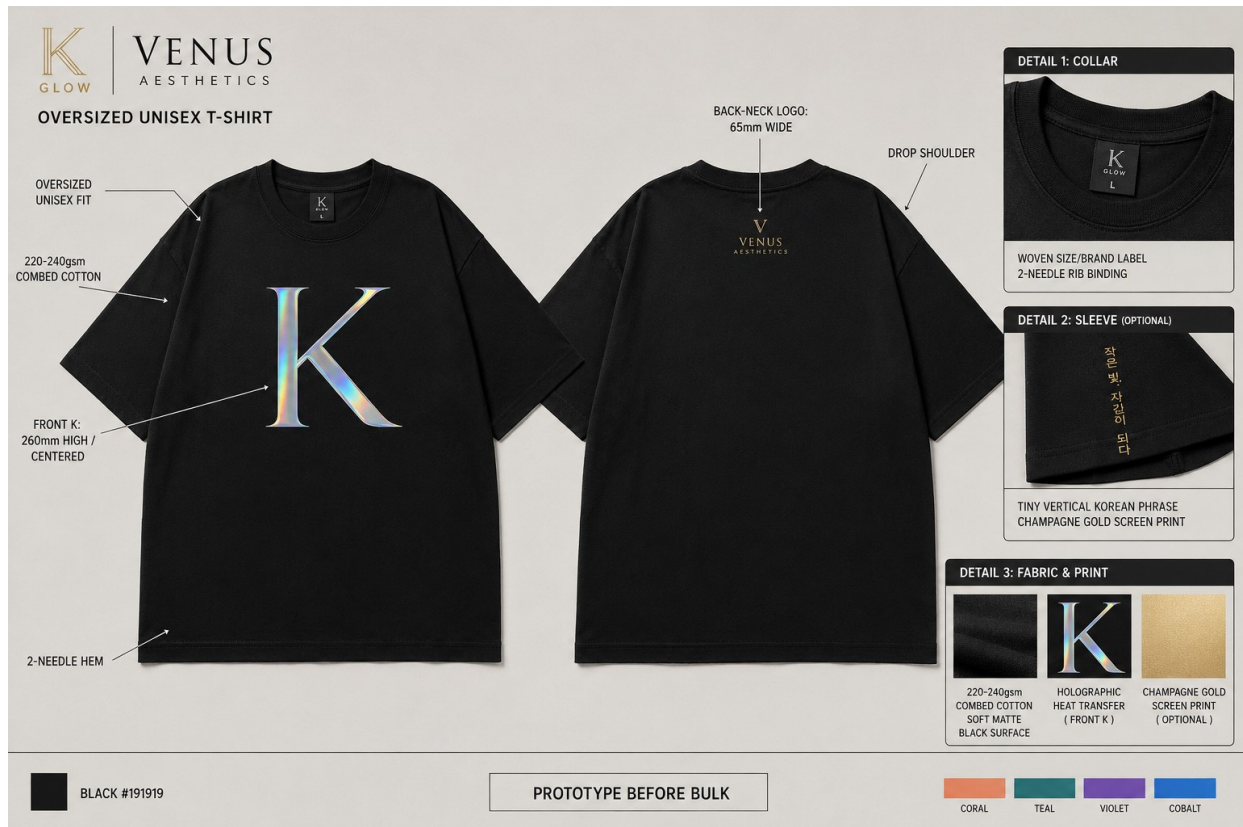

Vendor reference for the rigid shell, mirror, full-tray reveal card, EVA insert and exactly three lower-tray contents.

- **Prototype.** Confirm the real folded T-shirt dimensions before finalizing the EVA cavities and finished internal depth.
- **Sequence.** The reveal card must completely hide all merchandise until it is lifted by the two side pull tabs.
- **Tolerance.** Vendor prepares a dieline and white sample; production dimensions are confirmed after fit testing.

ARTWORK NOTE This rendered board communicates construction intent; the packaging vendor must issue an exact CAD/dieline for sign-off.

07 | MERCHANDISE PRODUCTION

Oversized T-shirt: front, back and finish plan

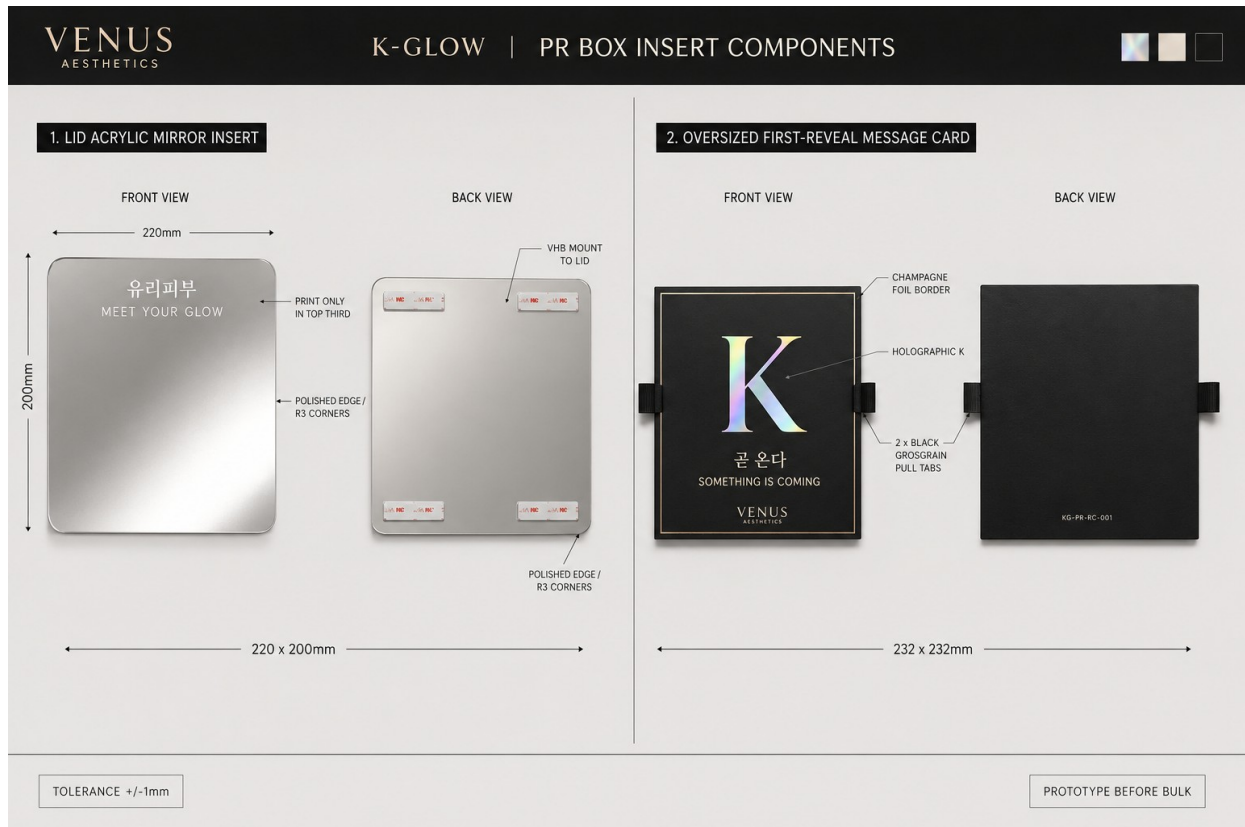

Manufacturing direction for the only apparel item in the PR box.

- **Front.** Large centered holographic K, 260mm high, on a premium black oversized unisex 220-240gsm cotton tee.
- **Back.** Small official Venus vector logo, approximately 65mm wide, centered 25mm below the back collar.
- **Approval.** Confirm size range, wash test, print adhesion, shrinkage and sleeve copy before bulk production.

LOGO RULE The logos shown are position references; final artwork uses the supplied official Venus master files.

08 | INSERT PRODUCTION

Mirror and oversized reveal-card specifications

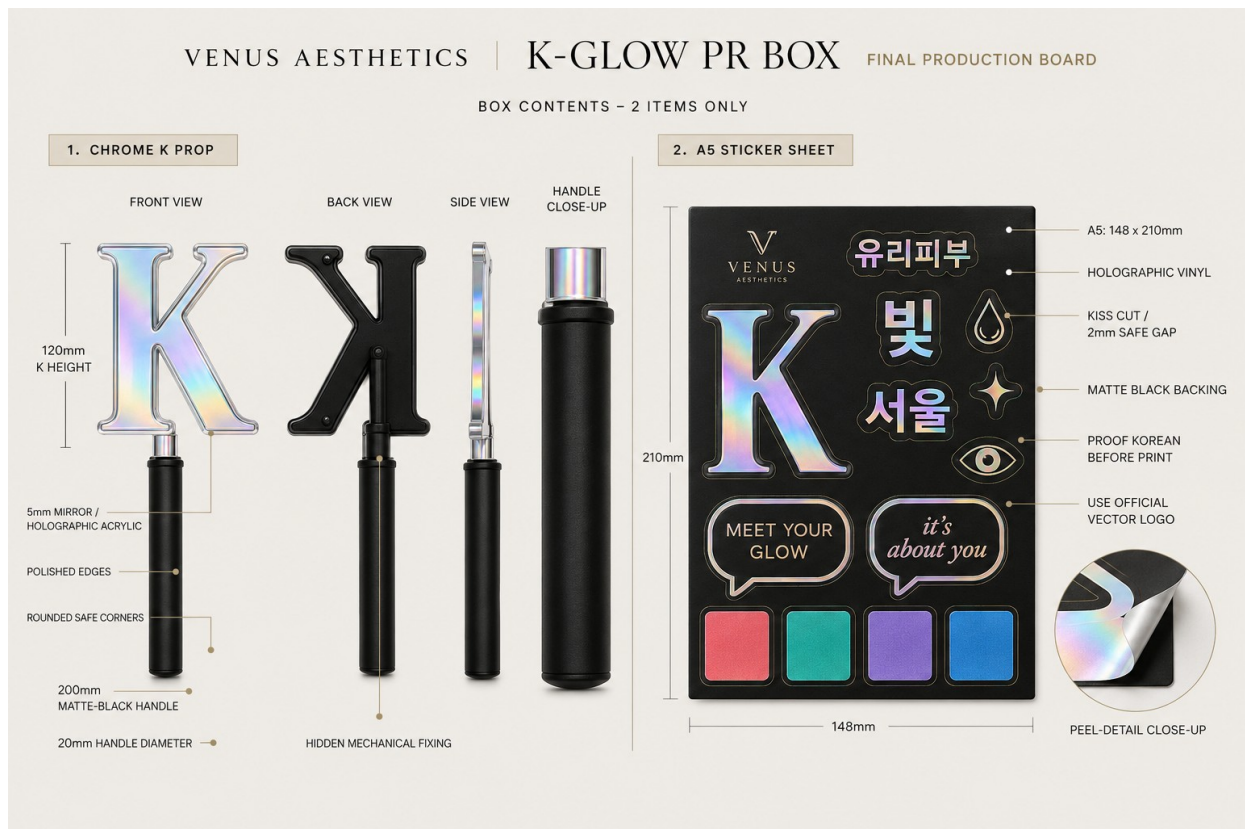

Front/back plan for the acrylic lid mirror and the single oversized first-reveal card.

- **Mirror.** 2mm mirror acrylic, 220 x 200mm, polished R3 corners; print stays in the top third; mount with tested VHB strips.
- **Reveal card.** Approx. 232 x 232mm, 600gsm black board, champagne foil border, holographic K and two black grosgrain pull tabs.
- **Proof.** Confirm reflected viewing area, adhesive compatibility, Korean copy and +/-1mm fit tolerance on the prototype.

SINGLE-CARD RULE This is the only card inside the PR box. It is oversized and covers the whole lower tray.

09 | SMALL-ITEM PRODUCTION

Chrome K prop and A5 sticker sheet

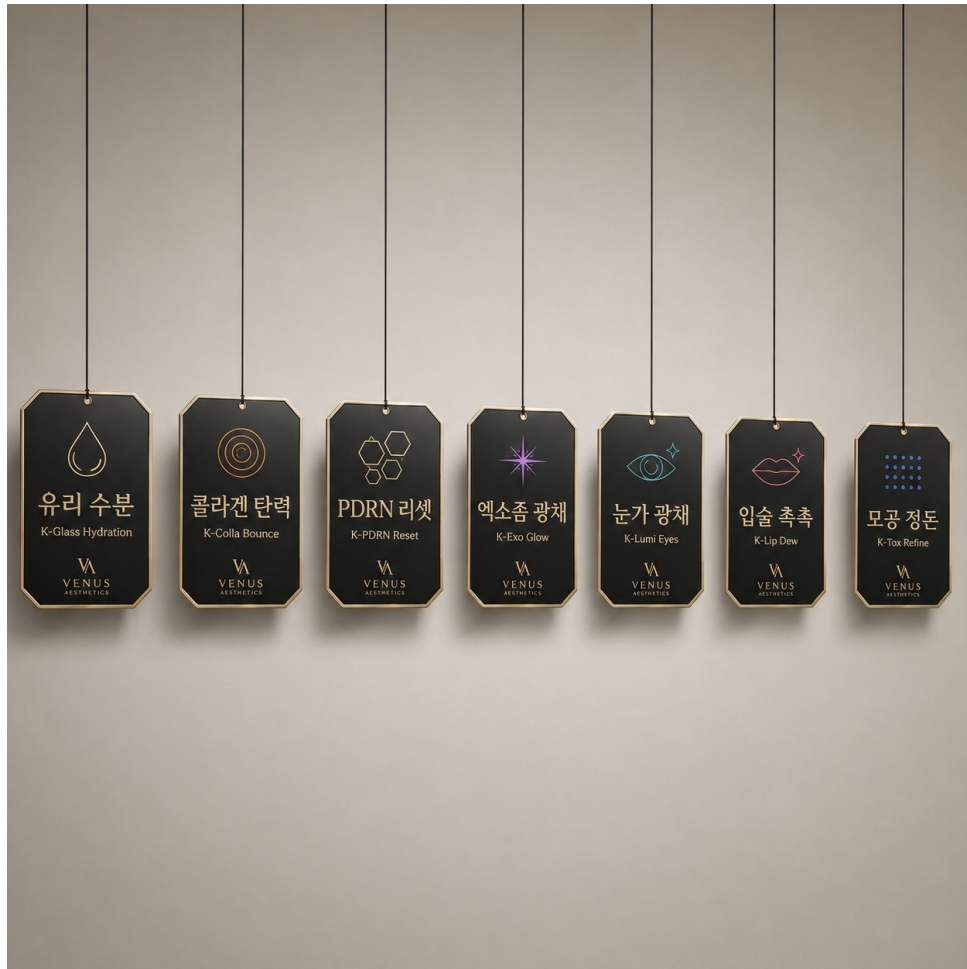

Production plan for the two small items below the reveal card.

- **Chrome K.** 120mm serif K in 5mm mirror/holographic acrylic with polished safe corners and a 200mm matte-black handle.
- **Sticker sheet.** A5 148 x 210mm kiss-cut holographic vinyl on matte-black backing with a 2mm safe gap.
- **Artwork.** Use the official vector logo and native-speaker-approved Korean copy; test peel strength and edge lift.

INVENTORY The sticker sheet contains beauty-language graphics only - no treatment cards or treatment-card set.

10 | CLINIC PROPS

Seven suspended face-free icon signs

Final sign family: no faces or photography - only refined line icons, clipped acrylic edges, Korean first and English second.

- **Construction.** Approx. 200 x 300mm, 5mm matte-black acrylic, clipped corners, one drilled top hole and fine braided cord or monofilament.
- **System.** Each treatment receives one simple line icon and one edge code: champagne, bronze, pale gold, violet, teal, coral or cobalt.
- **Installation.** Use removable load-rated hooks only where the clinic permits; otherwise use the weighted freestanding rack.

FACE-FREE RULE No portraits, faces, skin photography or emoji characters on any suspended or handheld prop.

11 | CREATOR PROPS

Seven matching face-free handheld props

Selfie-friendly icon paddles match the suspended sign system without using faces or looking like treatment cards.

- **Construction.** Approx. 140 x 210mm clipped-corner plaque in 5mm acrylic on a 200mm matte-black cylindrical handle.
- **Use.** One complete set at creator shoots; additional sets rotate through clinic events.
- **Copy.** One line icon, Korean treatment name and smaller English treatment name remain readable in guest photography.

FINISH STANDARD Use polished safe edges, consistent handles and one restrained color code per treatment.

12 | RECEPTION APPLICATION

Existing reception, icon props and restrained balloons

The existing reception remains intact while icon signs, a portable rack, paddles, mirror, chrome K and one controlled balloon cluster create the Korean layer.

- **No renovation.** Keep walls, desk, floor, ceiling, furniture and permanent Venus branding unchanged.
- **Installation.** Three lightweight signs may hang from approved removable clips; four use a freestanding weighted rack.
- **Balloons.** Use 15-20 matte balloons in cream, taupe, champagne and restrained accent colors in one reception/lounge corner only.

SAFETY Do not block the entrance, logo, desk access, escape routes or clinic workflow; use weighted bases and removable fixings.

13 | TREATMENT-ROOM APPLICATION

Existing treatment room, removable decor only

The room stays fully clinical: one removable icon plaque, one slim vinyl panel, a mirror/message detail and a removable towel sleeve add the theme.

- **No balloons.** Balloons, food and floor decor remain outside every treatment room.
- **Hygiene.** Keep decor away from the bed head, sterile worktops, sink splash zone, device vents and clinical access.
- **Removal.** Use removable wall rails, low-tack tested vinyl and washable or disposable textile sleeves; no repainting or built-ins.

ROOM RULE Nothing hangs above the patient or obstructs staff, devices, ventilation, handwashing or emergency access.

14 | EVENT HOSPITALITY

Korean snack bar: modern, practical, lounge-only

Portable Korean catering station with bilingual labels, reusable serving ware, allergen information and lounge-only service.

- **Food.** Ramyeon, tteokbokki, mini kimbap, mandu, Korean chicken bites, hotteok and seaweed snacks.
- **Drinks.** Yuzu, Korean pear and water in reusable glass dispensers.
- **Controls.** Use a halal-capable caterer, vegetarian options, covered hot holding, allergen cards and no food in treatment rooms.

REMOVED No prize wheel, gift bags or glow-match desk. Hospitality is the event interaction.

15 | TRAVELLING SET

Portable Korean-modern photo set

Three-panel set with visible folding feet, lighting stands, padded covers and flight case for realistic transport between clinics.

- **Panel 1.** Pale oak vertical slats on a light two-person-carry frame.
- **Panel 2.** Warm-white dimmable diffuser panel.
- **Panel 3.** Plain cream panel with mirror K and straight lit glass shelf.

INSTALLATION The set occupies one clinic corner only and does not alter the building.

16 | SOCIAL MASTER 01

Meet Your Glow

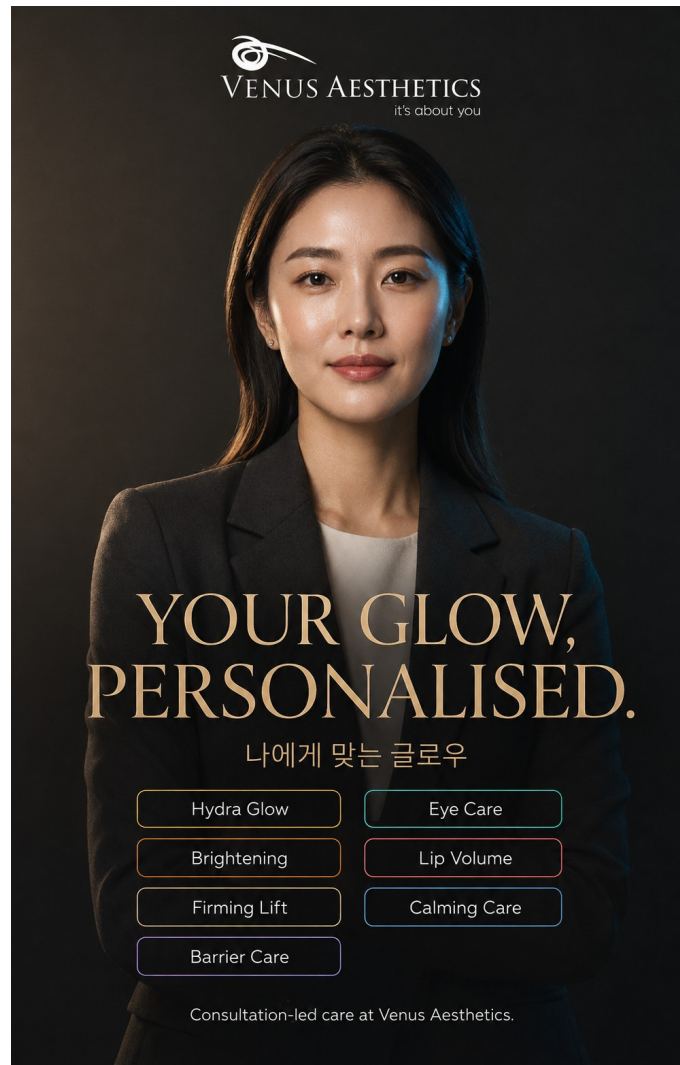

Hero campaign visual: Venus black/cream editorial structure, Korean model, bilingual beauty cue and restrained accent tabs.

- Use as the campaign introduction, clinic screen visual and creator briefing cover.
- Crop from the master for feed, story and vertical screen formats.
- Replace concept model with licensed final photography while preserving composition and lighting direction.

17 | SOCIAL MASTER 02

Your Glow, Personalised

Treatment-system visual: consultation-led care presented in a modern Venus feed language.

- Use for education, consultation messaging and pinned campaign explanation.
- Keep treatment tabs as digital navigation labels; these are not physical cards and are not included in the PR box.
- Medical and advertising claims require internal clinical and legal review before publication.

18 | SOCIAL MASTER 03

Glass Skin, Your Way

Close-up skin editorial: realistic texture, clean split composition and direct Venus ownership.

- Use for teaser, skin-quality storytelling and in-clinic digital screens.
- Retain natural pores and texture; avoid plastic retouching or exaggerated glow claims.
- No date, countdown, before/after comparison or procedure imagery.

19 | PR BOX BILL OF MATERIALS

Vendor-ready component schedule

The table below defines every approved component. Vendor CAD, dielines, color proofs and physical samples remain mandatory before bulk production.

COMPONENT	SIZE	MATERIAL / FINISH	APPROVAL CHECK
Rigid box shell	250 x 250 x 80mm internal	1200gsm greyboard; black soft-touch wrap; magnetic flap	Dieline, white sample, corner/hinge test
Lid mirror	220 x 200mm; 2mm	Mirror acrylic; R3 polished corners; top-third print	Reflection area, VHB test, edge safety
Reveal card	Approx. 232 x 232mm	600gsm black board; champagne foil; holographic K; 2 pull tabs	Full tray coverage, Korean proof, tab pull test
EVA insert	Cut to approved contents	High-density black EVA; clean CNC/water-jet cavities	Final folded-tee fit; no extra cavities
T-shirt	Oversized size range; 220-240gsm	Combed cotton; front chrome K; small back-neck logo	Fit sample, wash/shrink and adhesion test
Chrome K prop	120mm K + 200mm handle	5mm mirror/holographic acrylic; matte-black handle	Safe corners, hidden fixing, drop test
Sticker sheet	A5 / 148 x 210mm	Kiss-cut holographic vinyl; matte-black backing	Vector/logo proof, Korean proof, peel test

ABSOLUTE INVENTORY One mirror, one oversized reveal card and exactly three lower-tray contents. No treatment cards, samples, vials, narrow slots or substitute gifts.

20 | CLINIC DECOR DEPLOYMENT

What goes where

ZONE	APPROVED CONTENT	INSTALLATION / SAFETY
Reception / lounge	3 suspended icon signs; rack with 4 signs; 7 handheld props; oval mirror; chrome K; one 15-20 balloon corner cluster	Removable hooks and weighted bases; keep entrance, desk, logo and escape path clear
Treatment room	1 removable icon plaque; 1 slim vertical vinyl panel; 1 mirror/message detail; 1 removable towel sleeve	No balloons, food or ceiling suspension; keep clear of bed head, sink, sterile surfaces, vents and devices
Event lounge	Korean snack bar; bilingual labels; allergen board; reusable serveware	Halal-capable catering; hot/cold holding; food never enters treatment rooms
Photo corner	Portable 3-panel set; lights; mirror K; shelf; flight case	Use one approved corner; maintain access width and weighted/folding-base stability

BALLOON RULE Balloons are approved only as a restrained reception/lounge corner feature. They are not approved inside any treatment room.

- **Before installation.** Branch manager approves exact positions, attachment method, access clearances and removal timing.
- **After removal.** Installer removes adhesive residue, fills no holes and returns every surface to its original condition.
- **Final artwork.** Use true vector icons, official Venus logo masters and native-speaker-approved Korean copy.

21 | PRODUCTION QUANTITIES

Recommended procurement list

Quantities below retain the original six-clinic working assumption. Confirm clinic count before issuing purchase orders.

ITEM	PRODUCTION SPECIFICATION	QTY
Rigid PR box	250 x 250 x 80mm; magnetic flap; soft-touch black wrap	15
Acrylic mirror insert	2mm; 220 x 200mm; printed top third	15 + 2 spare
Oversized reveal card	Approx. 232 x 232mm; 600gsm black board; foil	20
Oversized T-shirt	220-240gsm cotton; chrome K; official back-neck logo	25
Chrome K box prop	120mm; 5mm mirror acrylic; black handle	20
Sticker sheet	A5 holographic vinyl; kiss cut	500
Suspended icon signs	Seven face-free designs; approx. 200 x 300mm; cord + clips	42
Handheld icon props	Five face-free sets of seven; 5mm acrylic	35
Portable display rack	Weighted black frame for four signs	6
K standee	1700mm; mirror vinyl; weighted base	2
Reception balloon kit	15-20 matte balloons; weights, pump and corner installation	6 kits
Treatment-room decor kit	Plaque, vinyl panel, mirror detail and washable towel sleeve	6 kits
Korean snack bar	Reusable table, vessels, signage and allergen kit	1 kit
Travelling photo set	Three panels, lighting, covers and flight case	1 set
Social key visuals	Three masters plus platform crops	3 masters

SCOPE CONTROL Do not add treatment cards, gift bags, a prize wheel or a glow-match desk to any vendor quotation.

22 | EXECUTION AND APPROVAL

What happens next

1. Brand master handoff

Provide official vector logos, Haboro Contrast, Zona Pro and approved production color values.

2. Korean-language proof

A native Korean speaker signs off every phrase before artwork release.

3. Artwork finalization

Replace all concept logo approximations, redraw the icon family as true vector artwork and native-proof Korean copy.

4. Physical prototypes

Produce one box, T-shirt, reveal card, hanging icon sign and handheld icon prop for review.

5. Clinic fit test

Confirm ceiling-clip policy, cord length, rack footprint, access routes and weighted-base safety.

6. Catering trial

Use a halal-capable caterer, confirm vegetarian choices, allergens, holding temperatures and lounge-only service.

7. Final production

Release quantities only after prototype, photography, Korean proof and clinic fit test are approved.

Vendor acceptance checklist

- ZERO treatment cards and ZERO narrow card slots in the PR box.
- First reveal is one full-tray message card; underneath are exactly three items.
- No date, countdown, wave pattern, swirl or marbling on any approved asset.
- Official vector logo replaces all concept-rendered logo approximations.
- All Korean wording and line breaks are proofed before print.
- No faces or portraits appear on any hanging or handheld treatment prop.
- All suspended props use load-rated removable fixings or freestanding racks approved by the clinic.
- Balloons are restricted to reception/lounge corners and never enter treatment rooms.
- Food is served only in the lounge with allergen, halal and hygiene controls.

APPROVAL GATE The creative direction is ready for team sharing. Production files begin only after the seven execution steps above are assigned to named owners.
